Dear Sir:

In a Notice to Comply with Requirements for Patent Applications Containing Nucleotide Sequence and/or Amino Acid Sequence Disclosures mailed on January 26, 2004 in the above-identified application, the applicants are notified that a computer readable form of the sequence listing was not submitted to the US Patent and Trademark Office. The applicants are invited to submit a computer readable form of the sequence listing and a statement that the content of the sequence listing information recorded in computer readable form is identical to the written sequence listing.

In response, applicants submit that a paper copy of the "Sequence Listing" was submitted on September 30, 2003 with the filing of the present application. The present application is a continuation of Application Number 09/118,637, filed July 17, 1998. Applicants submit that the paper copy of the "Sequence Listing" submitted on September 30,

2003 in the present continuation application is identical in content to the computer readable form submitted on October 2, 1998 in the parent application (copy enclosed herewith) and currently on file with the United States Patent and Trademark Office. Applicants note that the computer readable form submitted on October 2, 1998 in the parent application was compliant with all of the requirements under 37 C.F.R. 1.821(e). No new matter has been added by this submission. Therefore, in lieu of filing a duplicate computer readable form in the present application, applicants request the use of the compliant computer readable "Sequence Listing" that is already on file for the parent application identified above.

No fee is believed to be due in connection with this substitution. However, if any fee is due, please charge the fee to the Deposit Account 17-0055.

Respectfully submitted,

Sara D. Vinarov
